Technologies Used

→HTML

Hypertext Markup Language is the standard markup language for documents designed to be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheets and scripting languages such as JavaScript.

→CSS

Cascading Style Sheets, fondly referred to as CSS, is a simply designed language intended to simplify the process of making web pages presentable. CSS allows you to apply styles to web pages. More importantly, CSS enables you to do this independent of the HTML that makes up each web page. It describes how a webpage should look

→JavaScript

JavaScript, often abbreviated as JS, is an interpreted programming language. JavaScript is high-level, often just-in-time compiled, and multi-paradigm. It has curly-bracket syntax, dynamic typing, prototype-based object-orientation, and first-class functions.

About Project

1. Construction Website

“Construction Website” is complete package for Construction website built using HTML , CSS & JavaScript to show information about their company and provide information regarding their project, business and career opportunities provided in their company.

It is well designed to fulfilling their requirements, so that their valuable data and information can be stored and published on Internet to reach out to their clients & customers

Therefore I have design exclusive Construction Website that are adapted to the organization’s structure and also can be modified to cater different needs of the organization

2. Objective of your Project

The objective of the project is providing a simple and elegant website to the user so that they can use the website to show information about their company and the services offered. It will help the business and Start-ups to gain popularity and reach to the customers. It help business to briefly describe the services that they offer and show their features so that customer can wisely understand the reasons to choose them for their needs.

It also help to company to show achievements & their legal documents and recognitions and show reviews of their past customers. It also provide space to show vision and objective of the company. They can show their businesses and their current and past projects with Media & Career Section .

Also , Dedicated Contact Us page so that their customer can reach to them and Login Page for Admin to do modification is provided.so it meets the objective and individual customization can be done to improve user experience

3. Briefly describe your Project(font size: 20 bold, left align)

Font & Icons:

```
<link rel="stylesheet" href="https://cdnjs.cloudflare.com/ajax/libs/font-awesome/5.15.3/css/all.min.css">
```

The text "Our Featured Work" is displayed in a sans-serif font. "Our" and "Featured" are in a dark blue-grey color, while "Work" is in a bright yellow color. The text is centered within a light grey rectangular background.

Navbar : A Navigation Bar inside Header is present at the top and pages have linked with CSS properties like below to make it more interactive
